

Comprehensive range of indicators for wash monitoring and sterility assurance

GETINGE 

Added assurance

- for clean and sterile goods

Getinge Assured indicators provide you with the added assurance that your equipment is clean and sterile, as expected.

Every day you reprocess a variety of instruments at different times, temperatures and conditions. You need reassurance that your sterile goods have been thoroughly cleaned and sterilized in accordance with your local standards and hospital requirements.

Getinge is a world leader in cleaning, disinfection and sterilization equipment, with solutions for the healthcare and life science sectors. We understand that you need your disinfection and sterilization equipment to consistently perform to manufacturer's specifications in full compliance with all requirements and standards.

Getinge Consumables

- The complete solution

The Getinge Consumables offering is a comprehensive portfolio of products to support you in every step of your workflow. Getinge products conform to relevant standards, ensuring consistent and accurate quality of your results.

Getinge Clean

Getinge Clean is a complete detergent offering for global markets requiring enzymatic, alkaline or neutral cleaning solutions, suitable for both manual and automated processing. We offer specialized chemistry — such as Prion and MIS detergents — as well as pre-treatment foam to help keep instruments moist. We also offer rinse aid, lubricants, neutralizers and various descaling products including chamber foam as part of our maintenance offering.

Getinge Pack

Keep your patients safe by using high-quality sterilization products. Even the most robust disinfection and sterilization processes can be rendered ineffective if the integrity of a medical pouch or its closure has been compromised during storage, handling, or transportation. That's why Getinge Pack Sterilization Pouches and Rolls have been designed to provide an effective microbial barrier that significantly minimizes the risk of recontamination.

Standard pouch

Standard roll

Pouch made of Tyvek®

Roll made of Tyvek®

DuPont™ and Tyvek® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

Get accurate and consistent results

- Every time, every day

Improve patient safety

You can reduce the risk of hospital-acquired infections. Getinge Assured indicators are a relatively low-cost method of monitoring the success or failure of the entire decontamination process. This will help manifest itself in fewer cancelled operations, just-in-time delivery of sterile instruments and contribute to the optimization of the patient's experience.

Increase efficiency in your workflow

Our training programs — available both face-to-face and electronically — give you the tools you need to ensure consistent and accurate results for every point of your workflow. Our sales tools and reference guides make it easy to interpret our products. All products come with clear pass/fail reference guides.

Compliance with relevant international and local standards

Our products give you complete peace of mind. Getinge Assured products are all manufactured in ISO 9001 and ISO 13485 certified Getinge facilities and are tested against all relevant standards such as EN ISO 15883, EN ISO 11140 parts 1 & 4, and EN ISO 11138. We offer certificates of compliance for the complete range, as well as 3rd party independent certificates for most products.

Reduce environmental footprint

Getinge Assured goes beyond wash monitoring and sterility assurance. We also give you complete control in how you impact your local environment. Our unique ink technology is non-toxic and contains no heavy metals in their base ingredients.

Wash Release Monitors

- The first important step in sterile processing

Effective cleaning is the first important step in sterile processing. The best way to verify cleanliness is a reliable testing protocol that includes test soil, wash monitoring, and residual protein testing.

Used routinely in washer-disinfectors or ultrasonic baths, our Getinge Assured Wash Monitors provide independent verification that the cleaning process is consistently providing the desired result.

As a final assurance of cleanliness, we offer a full range of residual protein tests for surfaces and instruments – including hollow lumens and endoscopes. With an instant protein reaction, these tests are quick and easy to use and can detect residual protein down to 1 microgram in less than 10 seconds.

Getinge Assured Protein Test Dental

Machine Release Monitors

- Assurance of equipment performance

The Bowie-Dick-type test remains the benchmark for daily testing of the mechanical function of your vacuum-assisted steam sterilizer.

Getinge Assured Bowie-Dick tests monitor the effective air removal and steam penetration allowing you to release your sterilizer for daily use. Getinge's innovative Bowie-Dick type tests have been developed and tested to conform to the requirements of EN ISO 11140-4.

With highly sensitive advanced ink, our technology provides greater accuracy and user information on process conditions compared to conventional test packs.

Getinge Assured AdvaTec Bowie-Dick Test Pack 134°C*

Getinge Check Mini Bowie-Dick Pack 134°C**

Getinge Assured Bowie-Dick Test Pack 121°C & 134°C*

Getinge Check Bowie-Dick Test Pack 134°C**

Getinge Assured Bowie-Dick Test Card TT

Getinge Assured Bowie-Dick Test Card 134°C

Getinge Assured Bowie-Dick Test Sheet 134°C

* For use in Getinge GSS67H and HS66 Turbo Steam Sterilizers

** For use in all sterilizers except Getinge GSS67H and HS66 Turbo

The compact design of the Getinge Assured AdvaTec and the Getinge Check Mini Bowie-Dick Test requires less paper and minimizes usage cost, transport cost, storage space, and environmental footprint.

Load Release Monitors

- Assurance of effective sterilization conditions

A chemical or biological process challenge device (PCD) gives the assurance that correct conditions have been achieved in the sterilizer chamber.

Product name	Spore Type	Incubation
Superfast 20 Biological Indicator (Steam)	10 ⁵ Geobacillus stearothermophilus	20 minutes
Superfast 20 Biological Indicator (VH ₂ O ₂)	10 ⁵ Geobacillus stearothermophilus	20 minutes
Smart-Read Biological Indicator (Steam)	10 ⁵ Geobacillus stearothermophilus	10 hrs Fail; Cycle Verification: 3 to 5 hrs
Self-Contained Biological Indicator (Steam)	10 ⁵ Geobacillus stearothermophilus	24 hours
Self-Contained Biological Indicator (EO)	10 ⁶ Bacillus atrophaeus	48 hours
Self-Contained Biological Indicator (VH ₂ O ₂)	10 ⁶ Geobacillus stearothermophilus	24 hours

Getinge Assured Superfast 20 Biological Indicator (Steam and VH₂O₂)

Getinge Assured Express Incubator

Getinge Assured Smart-Read Biological Indicator (Steam)

Getinge Assured Smart-Well Incubator with Printer

Getinge Assured Self-Contained Biological Indicator (Steam, EO and VH₂O₂)

Getinge Assured Multi Incubator

Getinge Assured Smart-Read Biological Test Pack

Getinge Assured Self-Contained Biological Test Pack

Getinge Assured Batch Monitoring System 3.5, 4, 5.3 & 7

Getinge Assured Helix Test 3.5, 4, 5.3, 7 & Formaldehyde

Getinge Assured 20 Superfast Biological Indicators for Steam and VH₂O₂ provides users the assurance that the sterilization load is safe to release in just 20 minutes.

Pack Release Monitors

- Sterility assurance at each instrument pack level

When a pack is opened, OR staff can quickly verify sterilization conditions were achieved, and the pack is safe for use.

Getinge Assured Emulating Indicators are the most advanced chemical indicators for monitoring the specific steam sterilization parameters of time, temperature, and steam inside the pack.

With a firm belief that every person and community should have access to the best possible care, Getinge provides hospitals and life science institutions with products and solutions aiming to improve clinical results and optimize workflows. The offering includes products and solutions for intensive care, cardiovascular procedures, operating rooms, sterile reprocessing and life science. Getinge employs over 10,000 people worldwide and the products are sold in more than 135 countries.

This document is intended to provide information to an international audience outside of the US.
